

Business Perspective

MCC Stimulates Economic Growth

- MCC’s past and present activities in the workforce accounted for \$548.5 million in labor income (i.e., wages, salaries, and benefits) and \$279.8 million in property income (i.e., dividends, interest, and rent) of the service area economy in FY 2006-07.
- Altogether, the MCC Service Area economy received roughly \$828.3 million in income due to the operations of MCC and the increased productivity of its past and present students.

Income Growth Due to MCC

(amounts in millions)

MCC Raises Consumer Spending

- MCC employed 632 full-time and 478 part-time faculty and staff during FY 2006-07, with an annual payroll of \$49.5 million.
- MCC had a total operating budget of \$70.1 million, of which \$60.8 million (or 87%) was spent in the service area.
- Approximately 10% of MCC’s student body came from outside the service area. These students generated an estimated \$755,400 in local sales while attending MCC.

MCC Creates a Skilled Workforce

- MCC activities encourage new business, assist existing business, and create long-term economic growth. The college enhances worker skills and provides customized training to local business and industry.
- It is estimated that in FY 2006-07 the MCC Service Area workforce embodied about 5.5 million credit hours of past and present MCC training. These added skills promote business productivity and increase income in the area.

Skill Levels Required by Area Jobs

EMSI is a leading provider of socioeconomic impact and strategic planning tools to community and technical colleges in the US and Canada. Visit us at www.economicmodeling.com for more information. To see full documentation of the study, please contact the college.
